**This design aims to capture the exuberance of a flower through a graphics calculator. In accordance to the theme, I hope to express my attitude towards life through this design created by my graphics calculator. I always believe in staying optimistic and enthusiastic. Therefore I chose to design a flower to represent this mindset because a blossoming flower exudes vigour. Leaves were drawn to add vitality to it. The rainbow in the background symbolizes optimism and hope. During this designing process, I have learnt and familiarized with several useful functions of the graphics calculator, such as 'Zoom'.**
