

**TEO NGEE YONG, 4I
DUNMAN HIGH SCHOOL**

A young boy introduced to the world of graphic calculator by my cousin arose my interest in graphic designing and later the graphic calculator. The sunflower depicts the ignited spark in my heart which later inspires me to come out with this design. The process was never easy. Coming up with the equation, synchronizing the individual pictures to give a coherent one was an uphill task. Therefore, the two eggs depicting the fruits of labour of hardwork and determination. The stars and sparkles represent the fire in my belly, never ending interest for math and graphic designing. I try drawing the picture first before constructing the equation, which makes this graphic designing even harder.
