

**HIEW KHEE CHUN, 04S12**  
**VICTORIA JUNIOR COLLEGE**

**I chose to draw Esplanade to reflect my love and passion for classical music. It's my favourite place because its library has a wide collection of music scores and presents many classical music concerts and theatres as well. It displays excellent fusion of science and arts, which can be reflected by graphics calculator(GC) design. I also produced this to proof to a friend that the Esplanade can be drawn using curves only. I learnt a lot about the power of GC as this is my first encounter with it. I also learnt about polar equations from friends taking Further maths to produce this image.**
