

**TAY YANG SHUN, 4A**  
**HWA CHONG INSTITUTION (HIGH SCHOOL SECTION)**

**This ship in the picture is called *The Mayflower*. I was doing research on ships and came across this picture. I noticed that the sails can be represented by curves. Therefore I came up with this design. I learnt how to manipulate graphs better, shifting them around and stretching them. Graphic calculators not only help me in mathematics, it also helps in history.**
