

**WAN YUNYU, 302**  
**NANYANG GIRLS' HIGH SCHOOL**

- My favorite cartoon star “Mickey” has been always been with me throughout my childhood.
- I used the graphic calculator to portray my favourite cartoon figure, it just shows how this calculator can be linked to the things I like in my life.

Through the process, I found the calculator a really amazing machine that can actually do a whole list of the things, including drawing my favorite cartoon star for example. Through further exploration, I have discovered many functions to create unusual shapes. Having spent 12 hours in total on this piece of work has also taught me more about determination.
