

**HENG HUI JUN LINA, SEC 3D  
METHODIST'S GIRLS' SCHOOL**

**Based on the theme “Graphical Calculators and Nature”, I brainstormed of little aspects of nature that do not really come to mind easily, such as the ladybird. Ladybirds look cute and have a diverse variety of species that arouses your curiosity, just like graphical calculators having a wide range of areas waiting to be explored.**

**At first I thought it was impossible to create such elaborate designs. The going was tough initially but as I got used to the calculator and its functions, it became more interesting and I learnt to embrace the wonders of the calculator.**
