

**CYNTHIA WIRANEGARA, SEC4A1  
METHODIST GIRLS' SCHOOL**

As the theme for this year is “Graphic Calculators and Nature”, I decided to have a design about my mum’s garden. There are various types of beautiful flowers in my mum’s garden and sometimes butterflies just come to have their touch and go feast. Butterflies are known for their ability to taste using their feet which is quite unique as compared to other animals. I have learned various uses of polar equation to draw some parts of this design.
