

**YANG BOWEN, 06S6K**  
**HWA CHONG INSTITUTION**

**The theme of this year is Nature and I. What immediately came to my mind was a natural, tranquil scene at the seaside when the sun's slowly rising above the horizon, lighting up the ocean and giving out energies for the growth of plants and animals. I am just an inconspicuous crab at the beach, innocently exploring the surroundings and searching the meaning of life.**

**What I have learnt are essentially two things – passion and patience. As we all know that GC design is troublesome and time-consuming, only with passion and patience could I move on despite the numerous errors and difficulties and ultimately create this art piece.**
