

**ADITHYA, 05S33**  
**VICTORIA JUNIOR COLLEGE**

**I chose the design as it somewhat, I guess, links to the theme of the competition, which is “nature”. The design shows the scenery of the balance of living lives. The design depicts how each individual in the ecosystem forms a balance and each of them compliment each other. After so many trials and errors, I found how powerful graphic calculator (gc) is in creating many interesting pictures. Using different equations in the forms of polar, Cartesian and parametric, many interesting pictures can be produced. It is an interesting way of learning mathematics.**
