

**CHINTAKUNTA SRUTHI REDDY, 05S33**  
**VICTORIA JUNIOR COLLEGE**

**I chose to draw the spider crawling on its web and showed the picture from the opposite side from which it is crawling. I did this because spiders are interesting creatures in nature and have special properties of sticking to vertical areas and climb up. I showed the view of the web from an angle so that the picture of the web widening in the outer rim can be seen.**

**In this process I learnt to increase my patience and learnt how fun designing on the GC can be. Plus I also learnt about the graphs certain formulas can give.**
