

**KEVIN LOW ENG MENG, 3.9 Zephaniah  
ANGLO-CHINESE SCHOOL (INDEPENDENT)**

**I chose this design because I like sine and cosine waves and graphing them is also very fun. When I drew two of them simultaneously, I thought they looked like hills, so I tried adding a sunrise. I remembered the circle function, and I was worried that I'd get a full circle, but the square root function solved that.**

**I learnt more about the square root function, and more about the functions of my GDC.**
