

**EDWARD HALIM, 06S41  
VICTORIA JUNIOR COLLEGE**

**The design basically shows a goal post with a ball, depicting the real design of the ball used in the recent world cup 2006 in Germany. I have passion in football and, to me; football means teamwork and beautiful play. This is the reason why I selected this design. After trying a few trials using the gc, now then I realized how powerful this tool is in constructing many different yet amazing pictures. Besides, now I knew that polar and parametric equations could give you interesting images. I believe that this product of technology has really made the learning of mathematics more interesting and meaningful.**
