

ALL NEW  
GC SKIN

## **CHUA WANG ZHI, SEC 3H HWA CHONG INSTITUTION**

**The words “graphics calculators” and “fashion” are seldom placed together. Therefore, I decided to change that and make graphics calculators “fashionable”. Instead of the old and plain cover for the graphics calculator, I had designed a skin, meant for the covers of graphics calculators.**

**Through the process of coming out with this design, the most important thing that I had learnt is perseverance, as the equations have to be tested and adjusted repeatedly to attain perfection. Having little prior knowledge of using the graphics calculator, I also had to familiarize with the use of it.**
