**As many types of fashion blossom around the world, Batik is still a fashion that attracts so many people for its beauty and intricate design. Batik is also a national identity of Indonesia and related to its traditional costume. It has existed since long time ago and has developed in becoming international tourist attraction. Many people, especially Caucasians like it. The elaborate design needs careful dexterity and passionate souls. I would like to show its beauty through the theme “Graphic Calculator and Fashion” as there are a few people who do not know batik.**
