

LEE PEI YI, 2A06
TEMASEK JUNIOR COLLEGE

I chose to create a design of a ring because I was inspired by an advertisement posted at my bus-stop. The advertised ring was beautiful and I wanted to create something similar to that. Rings are relevant to the theme of fashion. The design of the flower follows the fashion trend of complexity within simplicity. A simple flower shaped diamond can have many intricate cuts within it. This GC design holds a certain romantic feel behind it, giving it an extra edge. This design of a diamond ring is not just an accessory, it appeals to most women, since it is often said that diamonds are women's best friend. Due to its popularity among women, different cuts and shapes of diamonds have set fashion trends for the past few centuries.
