I feel that fashion allows people to show their best side to the world, which is normally hidden from view. The flower unfurling slowly symbolizes the power of fashion to reveal the inner beauty. Through the designing process, I have learnt that sometimes there is more than one way to achieve the same outcome. I encountered problems trying to shade different parts of the curves. Instead of merely relying on the in-built functions, I tried out custom programs and tweak them slightly. Also, I learnt to be patient as I have to try out different combinations of curves.
