First thought that came to mind when word “fashion” was clothes. However, nowadays shoes have also become a fashion of its own that big companies start taking their shoes business seriously, with advertisements that included famous stars, be it sportsmen or artists, and launching of limited edition shoes. Numerous youths have a few hundreds shoes as collection despite their expensive price that shows how popular shoes are as fashion items. This picture is inspired by my own shoes with a bit of remake. The strips are supposed to come in red-white colour combination, that symbolizes my country's flag colour.
