

DO THUC TRUC, 432
ST JOSEPH'S INSTITUTION

In my opinion, the idea of fashion is trendy and elegant clothes. As such, I chose to design a dress which was displayed in the shop window. The dress has shiny look and it conveys the idea of elegance and luxury. During the process, I learnt how to alter the constants of the equations to get the desired curves to form the shape I want. Many equations give different kind of curves and if know how to use them correctly, the combination of curves can be quite impressive.
