

**LEE XIN EN GERALDINE, 06IP06
NATIONAL JUNIOR COLLEGE**

This design is about ice skating. The curves behind the person show the speed of the person. The dots represent the ice. I chose this topic because I am always amazed at how graceful and beautiful the ice skaters can skate and I wished I could be like that.

I have learnt that GC is a very interesting and good tool as there are many functions that I have yet to discover.
