

**JENNIFER RUSLAM, 4G
METHODIST GIRLS' SCHOOL**

A heart written 'SPORT': S depicted by different balls; P-golf stick; O-soccer ball, probably the world most popular sport; R-ice-skating shoe; T- archery-bow and arrow, shows how sports are stuck on my heart. Black-and-white squares on heart depict chess board is used as base on this sport which represents how I love sports, from the bottom of my heart. Sports are flexible and available on land, water, or even ice as silhouetted beside the heart.

With the help of graphic calculator, I can pour my idea together as a concrete piece which made me not only loving sports but also mathematics which makes use of graphic calculators.
