

CHAN SAU YEE, 2A/07
TEMASEK JUNIOR COLLEGE

Being an avid fan of cycling, the picture of a cyclist participating in the world-renowned “Tour de France” immediately surfaced when I was told that the theme of the GC design competition this year is “Graphic Calculators and Sports”.

Although the cyclist’s face is not seen, his spirit of perseverance and determination are amply conveyed in the design. In fact, his unseen countenance serves as a metaphor: the strenuous effort every athlete puts in — all the hard work behind the scenes—is often not shown or even realized by others.

I explored and learned many new things about the GC in the process of coming up with this design. Now I am very confident using it to have fun with design.
