METHODIST GIRLS' SCHOOL**

Graphic calculator can help people to relax by drawing pictures, yet making people stress when they need to solve difficult mathematics' problems. Same thing goes with sports which can help us to relax and be happy when we are under pressure, yet sometimes might create disaster. A lot of people enjoy watching soccer, but sometimes can become quite addictive to it to a stage of fanatics. Hooliganism that surfaces from excessive support towards a certain club might cause lots of killings, brutality and sufferings towards soccer lovers. Hooliganism is wrong and thus must be stopped! If hooliganism is stopped, then there are more fun ways in enjoying sports. Similarly, if we treat mathematical problems as a fun thing, we can enjoy using the graphic calculator in all aspects.
