

TANG NINGRUI, 07IP01
NATIONAL JUNIOR COLLEGE

This design is inspired by the European Football Championship 2008 held recently. As the most popular sport in the world, football excites us because of its difficulty to score. This photo catches the moment of score perfectly. In the foreground, only the leg and the ball in goal were shot and that is the highlight. In the background, spectators are cheering for the exciting moment. The banner indicates the use of TI84+ calculator. The most commonly used functions are LINE and PEN, which draw out most of the figures. CIRCLE, PT-OFF, HORIZONTAL and VERTICAL are also used. With proper planning and patience, it is easy to create nice photos with GC using very simple method. This also inspires me to discover GC drawing further.
