When people think of sport, the thing that pop into their mind will be either euro cups, Olympics, F1, or any other ball games. However for me, sport is something you enjoy while doing it and not what the rest of the world are crazy about. Horse racing is often forgotten to be put under the sport category. There are even people who misunderstood it as a form of gambling and associate bad connotation to it. I created this graphic design to clarify this misunderstanding and to show the excitement and joy some people get from this form of sport. Furthermore I find it as a very unique and elegant sport. Not everyone knows how to appreciate it.
