

DANG BAO BAO, VICTORIA JUNIOR COLLEGE

The science of astronomy has dramatically developed since the invention of spaceships. Thanks to it, scientists can now discover planets and lives outside the earth at a higher level which is beyond our expectation hundreds years ago. That's why I decided to sketch the picture of a spaceship, so as to remind all of us about this achievement and those genius people who have spent a lot of effort to create it.

I have learned that GC is more than just a boring academic device. With patience and creativity, we can even turn mathematic equations into wonderful works of art.
