

**MUHAMMAD PHIRDAUS BIN MOHAMMAD YATIM,
CHANGKAT CHANGI SECONDARY SCHOOL**

From the start, I had not much idea about astronomy. But eventually I made up my mind to create this picture. Every night, I have been watching the beautiful stars glowing in the skies. Till one night, I wish that I could become an astronaut and travel to the moon to see the beautiful stars. I hope my dreams would come true. The picture is about a space shuttle launching from Earth with the moon and Sun in its sight.

I have learnt that astronomy is fun and we should protect the Earth from the adverse effects of global warming.
