

### **MA HUIYI, TEMASEK JUNIOR COLLEGE**

I chose “Chang Er Flying to the Moon”. It is a well known tragic love story in ancient China. We see that the ancients have strived to go to the moon and beyond. Personally, it also tells me that it is not impossible to fly to moon or other planets in the space. The effort we place in our work will enable us to achieve magnificent progress. I enjoyed manipulating equations to obtain the desired pictures and have learnt a lot of new maths equations from it.
