

NGUYEN VU LAN, ST. JOSEPH'S INSTITUTION

I chose the design of a shooting star which is “living” its very spectacular moment in the universe, leaving a brilliant trail of blaze across our Earth before it burns to ashes. To some, it may signify brilliance and technology beyond that of our own world to the universe we now explore. I also chose this design because the shooting star symbolizes one of the many passing chances that we all encounter in our daily lives but hardly ever notice. This competition is also one of them and I do not want to let it pass by without ever trying!
