

MOHAMED NASRUDDIN BIN ROSLAN, TAMPINES JUNIOR COLLEGE

I chose this view from outer space as it fits well with the theme. We can see Saturn with her majestic rings and a few other planets. In the background, our Sun shines brightly, with solar flares. Surprisingly, the process had left me with more learning points than I expected. I learnt more of how graphs work. Also, I noticed the Graphic Calculator lacked an 'undo' function. Whether a boon or bane, it did taught me to focus, and to continue from any mistakes I had done and improvise. Overall, I feel this competition to be an excellent initiative.
